# Alluminium Foil Vacuum Packing

PackAura Packaging offers Aluminum Foil Vacuum Packing—a high-barrier, moisture-proof solution ideal for protecting sensitive equipment, electronics, and metal components during long-term storage or export. This advanced packing method removes air from the package and seals it with multi-layer aluminum foil laminate, ensuring an airtight, corrosion-free environment.

Trust our Aluminum Foil Vacuum Packing to deliver unmatched protection for high-value items across global supply chains.

# Sea-worthy Packing

PackAura Packaging specializes in Sea-Worthy Packing solutions designed to protect your goods during international shipping and harsh marine environments. Our packaging systems comply with international export standards, ensuring maximum protection against moisture, corrosion, physical damage, and handling stress.

Choose PackAura's Sea-Worthy Packing to ensure your products arrive safely—anywhere in the world.

# On Site Packing

At PackAura Packaging, we offer reliable and efficient On-Site Packing Services, delivering professional packaging solutions directly at your location. Our expert team ensures that your machinery, equipment, or cargo is securely packed at your premises, saving you time, reducing handling risk, and ensuring export compliance.

Safe & Compliant: Ensures goods are packed as per export & safety standards, including ISPM-15 compliance.

# Nail Less Box

Discover the ultimate in convenience and safety with our Nail-less Box – a smart, eco-friendly packaging solution designed for quick assembly and secure storage. Crafted from durable materials, it eliminates the need for nails or screws, making it perfect for shipping, storage, and easy reuse. Its innovative design ensures strength and stability while reducing the risk of injury during handling. Whether you're in logistics, retail, or moving house, the Nail-less Box offers a reliable, time-saving alternative to traditional wooden crates.
